CRYSTAL URN COLLECTION

The Crystal collection is a unique combination of pure crystal glass and fine porcelain. Each Crystal urn consists of two elements: an outer crystal vessel, available in three distinctive designs (GABRIEL, URIEL and SARIEL), and an inner porcelain urn, available in a selection of colours.

Crystal urns symbolise the human soul in the physical world. Their purity and brilliance reveal the delicate, fragile porcelain within.

The HolyVerre Brand

We are the only manufacturer in the world producing urns made from pure crystal glass combined with porcelain.

All our products are handcrafted using traditional glassmaking techniques and the craftsmanship of skilled ceramic artisans.

To honour the memory of our loved ones, we design and create unique, one-of-a-kind urns. Every piece is made with exceptional care and attention to detail, and undergoes rigorous quality control.

What Is Crystal?

Crystal is often referred to as the „stone of stones". It symbolises light on Earth, while its transparency is believed to attract positive energy.

According to traditional beliefs, crystal possesses its own vibrations that harmonise with human energy. It is also believed to act as a filter, helping to remove negative energy.

For centuries, crystal has been associated with meditation, crystal healing and Feng Shui. It is also traditionally believed to enhance intuition and spiritual awareness.

GABRIEL

HOLY VERRE

An exceptionally elegant urn featuring an intricate diamond-cut pattern.

Hundreds of delicate facets symbolise the complexity of human life — a journey composed of countless moments, emotions and experiences that together create something truly beautiful.

SARIEL

HOLY VERRE

A beautiful crystal urn featuring the refined Manhattan cut.
Its clean, delicate lines, combined with the inner porcelain urn, create a harmonious composition of simplicity and elegance.

The timeless design evokes a sense of peace, reflection and quiet remembrance, honouring the memory of loved ones with dignity and grace.

How to Recognise Genuine Crystal

An urn made from crystal glass containing 24% lead oxide (PbO) possesses several distinctive characteristics that set it apart from ordinary glass. The lead oxide in the glass composition enhances its workability, allowing skilled artisans to create exceptionally intricate hand-cut patterns. Crystal glass is renowned for its remarkable clarity and brilliance. Its lead oxide content also makes it heavier than ordinary glass, contributing to its distinctive qualities.

Precise cuts combined with exceptional transparency allow crystal to refract and disperse light, creating spectacular reflections that shimmer with every colour of the rainbow. Our crystal collections are 100% handcrafted, from the initial glassblowing process performed by experienced glassmakers to the intricate finishing carried out by master crystal cutters. Every stage of production follows traditional craftsmanship techniques, preserving the authenticity and exceptional quality of each piece.

We believe that the love and energy of those we hold dear never truly fade. They live on in our memories, like light captured within crystal.

Every HolyVerre urn is a unique union of crystal, symbolising eternity and spiritual presence, and porcelain, reflecting the beauty and fragility of human life.

We handcraft more than urns. We create timeless works of remembrance, where love and memories endure forever.
